

The Prufrock Protocol — Dispersed Authorship

14 poets × 14 lines × 14 days. Illustrative slice: 5 poets × 5 lines. Assignment: precomputed random combinatrix (no self-adjacency).

Shared seed pair (extracted from a public-domain sonnet's volta)

↓ shown to every poet on day 1; each poet writes line 1 of their nominal poem ↓

Notation

P1 **P2** **P3** **P4** **P5** **S** Cell colour = author. S = shared corpus seed (not poet-authored).

—— Primary parent edge — each line is signed against the immediately prior line; subtler curves show second parent (k = 2): seeds for line 1, line k-2 thereafter.
