

GTD

Allen '00 · five phases

1

Capture

get it out of your head

2

Clarify

outcome and next action

3

Organise

put it where you will see it

4

Reflect

keep the system trusted

5

Engage

do the work

DRIVE

D

Define

what good looks like

R

Request

intent, context, done-criteria, assumptions

I

Iterate

stay in the loop and steer it

V

Validate

confirm against done-criteria or ground truth

E

Evolve

debrief, then update tooling, context, and practice

GOOGLE

Kam et. Al. '25 · six steps

1

Identify

spot the AI-suitable task

2

Engage

hand the work over

3

Evaluate

judge what came back

4

Calibrate

adjust how far to trust it

5

Tweak

refine the result

6

Finalize

own it and ship
